

# ENVIRONMENTAL GRAM

## Environmental Training

**Title:** Introduction to USMC Environmental Management System (EMS)

*There is now a short EMS tutorial now available on the USMC Web training portal, MarineNet.*

*This short training course (approx. 30 minutes) provides an introduction to USMC Environmental Management Systems concepts, terminology, requirements, and definitions using common mission support examples. The target audience is anyone on base who needs or is interested in the basics of an EMS so they can assist in identifying aspects and impacts, developing practice controls or writing and implementing the procedures to control those practices. The Environmental Branch, Installation & Logistics Division, hopes you find this training useful in providing some background information to your EMS team members, stakeholders and practice owners.*

*Please, forward or make available this same information to all employees in your section.*

*You can access the course using the directions below.*

1. Go to the MarineNet home page ([www.marinenet.usmc.mil](http://www.marinenet.usmc.mil) ~~<~~<http://www.marinenet.usmc.mil/>>)
